

# OTF2026

## Operations Transformation Forum

### Advancing Agentic Operations

🕒 22-24 June

📍 Bella Center, Copenhagen, Denmark

## OTF2026 Invitation

Dear Ms./Mr. \_\_\_\_\_,

The intelligent era is rapidly approaching, with new AI services and agents emerging every day. Agentic AI is no longer just a tool. It is becoming a core engine driving productivity, and reshaping the telecom industry. It is creating a new paradigm for operations where AI agents proactively perceive their environments and autonomously execute tasks in a closed-loop manner.

And so we invite you to join us for the 11th Operations Transformation Forum (OTF2026), which will be held on June 22 to 24 in Copenhagen, Denmark. Together, we will explore how carriers can seize these new opportunities and leverage their own unique advantages to unlock new value.

The theme of this year's event is "Advancing Agentic Operations". You will be joined by carriers, industry organizations, and partners from around the world to discuss the industry's latest innovations and best practices. Specifically, we will:

- Examine high-value scenarios across carrier value streams, including agile network monetization, user experience enhancement, and O&M quality and efficiency improvements.
- Discuss how to make the most of intelligent technologies to create a new paradigm for agentic operations together.

Come join us! As always, thank you for your ongoing support, and we look forward to seeing you in Copenhagen.

**Li Peng**
